Forecast for Wednesday 06 Nov 2024

Weather: A cloudy night and morning with occasional drizzle. A mainly dry afternoon and evening with some bright or clear spells developing, mainly across northern and eastern fells. More southern and central fells, including Scafell Pike staying largely cloudy with the odd spot of rain.

Chance of cloud-free hill tops above 800m: 20% overnight and morning becoming 70% in the afternoon across northern and eastern fells.

Low cloud and visibility: Extensive cloud above 400m overnight and morning with patches on lower slopes. The cloud will break up in the north and east during the afternoon but remaining more persistent elsewhere with bases 600 to 800m. Away from cloud, visibility mainly good, but sometimes less than 10 kilometres in any drizzle.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
Low cloud will make the rocks damp and slippery with difficult navigation conditions but improving in the afternoon across northern and eastern fells.

Forecast for Thursday 07 Nov 2024
Weather: Dry with clear spells developing overnight. High pressure will maintain dry weather with variable amounts of cloud shrouding the mid-slopes at times, especially across southern fells. Summits above 700 or 800m are likely to remain in clear or sunny conditions above the cloud inversion with spectacular views from the tops.

Maximum wind: South or Southeast 15 to 20mph gusts 30mph.

Chance of cloud-free hill tops above 800m: Mainly 70% with most summits at this height remaining above the cloud sheet. 30% across the south at first.

Low cloud and visibility: Mostly good visibility but poor at times with a sheet of cloud between 400 and 700m. Excellent visibility from higher summits sitting above the cloud.

Temperature: **Valleys:** Plus 9C rising to 15C.
At 800m: Plus 7C rising to 12C.
Freezing level: Above summits.
